

GLP1-S – 20mg

\$125.00 | 20mg Lyophilized Vial

GLP1-S is a high-purity research peptide designed for laboratory studies focused on **metabolic function, endocrine signaling, and GLP-1 receptor activity**. It is commonly used to investigate incretin pathways and receptor-mediated cellular responses.

Research Applications

- GLP-1 receptor activation studies
- Metabolic and endocrine signaling research
- Glucose regulation pathway modeling
- Cellular receptor and beta-cell function studies

Product Details

- **Classification:** GLP-1 Receptor Agonist
- **Format:** Lyophilized Powder
- **Quantity:** 20mg per vial
- **Purity:** >99% (HPLC Verified)

Research Use Only

This product is intended exclusively for laboratory and in vitro research. It is **not** for human or veterinary use, consumption, injection, or therapeutic purposes. Void where prohibited by law.
