

GLP2-T – 20mg

\$130.00 | 20mg Lyophilized Vial

GLP2-T is a high-purity research peptide designed to support laboratory studies focused on **gastrointestinal function, intestinal growth, and metabolic signaling**. It is commonly used to investigate GLP-2 receptor activity and gut-derived endocrine pathways.

Research Applications

- Intestinal epithelial and gut tissue studies
- Nutrient absorption and barrier function research
- Mucosal growth and cellular signaling
- Endocrine and gastrointestinal pathway modeling

Product Details

- **Classification:** GLP-2 Receptor Agonist
- **Format:** Lyophilized Powder

- **Quantity:** 20mg per vial
- **Purity:** >99% (HPLC Verified)

Research Use Only

This product is intended exclusively for laboratory and in vitro research. It is **not** for human or veterinary use, consumption, injection, or therapeutic purposes. Void where prohibited by law.
