

GLP-3 – 20mg

\$160.00 | 20mg Lyophilized Vial

GLP-3 is a next-generation research peptide designed to activate three key metabolic receptors: **GLP-1, GIP, and Glucagon (GCGR)**. This triple agonist is intended for advanced laboratory research exploring metabolic regulation and endocrine signaling.

Research Applications

- Triple receptor activation studies
- Metabolic and endocrine pathway research
- Glucose and energy regulation models
- Hormonal signaling and receptor interaction studies

Product Details

- **Classification:** GLP-1 / GIP / Glucagon Triple Agonist
- **Format:** Lyophilized Powder
- **Quantity:** 20mg per vial

- **Purity:** >99% (HPLC Verified)

Research Use Only

This product is intended exclusively for laboratory and in vitro research. It is **not** for human or veterinary use, consumption, injection, or therapeutic purposes. Void where prohibited by law.
